JAN.-SEPTEMBER 1969 JAN.-SEPTEMBRE

INTRODUCTION

Series B of the O.E.C.D. Bulletins of Foreign Trade Statistics is designed for the analysis of the pattern of trade flows between O.E.C.D. Member countries (1) and countries or country groupings of origin and destination, on the basis of the *Standard International Trade Classification (S.I.T.C.) Revised**.

The Series appears in six quarterly booklets, showing the latest trade information available for each reporting country, in the order of receipt of the basic data by the O.E.C.D. Secretariat. Data are shown in cumulative (year-to-date) form, against comparable figures for one or two back years.

Each reporting country's trade is analysed by S.I.T.C. Sections and relevant Divisions, Groups and Sub-Groups, with a breakdown by major partner countries and areas (2). The selection of both commodities and partner countries is based on the structure of the reporting country's trade, with due regard to the requirements of efficient data processing. Where available, volume and average value indices by commodity categories are shown in an annex.

A similar analysis of the value of trade is presented in Booklet 6 of this Series for groups of O.E.C.D. Member countries (O.E.C.D.-Total, O.E.C.D.-Europe, E.E.C. and E.F.T.A.).

Unless otherwise stated in the *remarks* to individual reporting countries, the following general definitions apply throughout:

a) Values are expressed in million United States dollars and relate to declared transaction values (imports c.i.f., exports f.o.b.). The conversion factors from national currencies into United States dollars are indicated at the head of each title page and relate in principle to International Monetary Fund parity rates;

b) Data relate to *special trade* as defined by the Economic and Social Council and the Statistical Commission of the United Nations;

c) Data cover *all goods which add to, or subtract from, the resources of a country as a result of their movement into or out of the country***, which implies in particular that:

- State trading, commercial transactions in military equipment and supplies, foreign aid transactions, improvement and repair trade, transactions in new ships and aircraft, electric energy and gas, and sea products landed direct from the high seas are *included* in the statistics;
- direct transit trade, temporary imports and exports, transactions in second-hand ships and aircraft, stores and bunkers for ships and aircraft, monetary items, and industrial gold, if the metal content accounts for 80 per cent of more of the total value, are *excluded* from the statistics. Minor transactions may also be excluded;

d) Commodities and commodity categories are defined and classified according to the *Standard International Trade Classification (S.I.T.C.) Revised**. But owing to lack of space it has been necessary to abbreviate some of the descriptions shown in the tables;

e) The geographical classification refers to countries of origin/consumption (last known destination). The statistical territory of these countries is defined in the O.E.C.D. Geographical Nomenclature at the end of the first volume in this series;

f) For some countries divergences may be found when comparing totals derived from different levels of the classification. This is due to the fact that certain data are treated as confidential mostly at lower levels of aggregation.

(1) Data are also shown for Yugoslavia, which is associated in certain work of the O.E.C.D.

(2) See page 4 for the composition of partner areas.

INTRODUCTION

La Série B des Bulletins du Commerce Extérieur de l'O.C.D.E. permet d'analyser, sur la base de la *Classification Type pour le Commerce International (C.T.C.I.) Révisée**, la structure des échanges commerciaux des pays Membres de l'O.C.D.E. (1) par pays ou zones partenaires.

Cette Série comporte six fascicules par trimestre, donnant les dernières informations disponibles pour chaque pays déclarant, dans l'ordre de la réception des données de base par le Secrétariat de l'O.C.D.E. Les données sont publiées sous forme cumulative pour l'année en cours, en regard des chiffres comparables d'une ou deux années précédentes.

Le commerce de chaque pays déclarant est analysé par section de la C.T.C.I. ainsi que selon les divisions, groupes et sous-groupes significatifs, avec une ventilation, par principaux pays et zones partenaires (2). Le choix des produits et des pays partenaires est déterminé d'après la structure du commerce du pays déclarant, compte tenu des exigences d'une exploitation automatique satisfaisante (3). Les indices de volume et de valeur moyenne par catégories de produit, lorsqu'il en existe, figurent en annexe aux tableaux.

Le fascicule 6 de cette Série présente de la même façon une analyse de la valeur du commerce pour les groupements de pays Membres de l'O.C.D.E. (O.C.D.E.-Total, O.C.D.E.-Europe, C.E.E. et E.F.T.A.).

Sous réserve des *observations* relatives à chaque pays déclarant, les définitions générales suivantes s'appliquent :

a) Les valeurs sont exprimées en millions de dollars des États-Unis, sur la base des valeurs de transaction déclarées (importations c.a.f., exportations f.o.b.). Les facteurs utilisés pour convertir les valeurs nationales en dollars des États-Unis sont indiqués sur la page titre de chaque pays et correspondent en principe au taux de change paritaire du Fonds Monétaire International;

b) Les chiffres concernent le *commerce spécial,* tel qu'il est défini par le Conseil Économique et Social et la Commission Statistique des Nations Unies;

c) Sont couverts *tous les biens qui, du fait de leur entrée ou de leur sortie, s'ajoutent aux ressources d'un pays ou les diminuent***. Il en résulte notamment les inclusions et les exclusions suivantes :

- Sont *inclus* dans la statistique le commerce d'État, les transactions commerciales portant sur l'équipement et l'approvisionnement des forces armées, l'aide extérieure, le commerce de perfectionnement et de réparation, les transactions portant sur les navires et aéronefs neufs, l'énergie électrique et le gaz, les produits de la mer débarqués en provenance directe de la haute mer;
- Sont *exclus* de la statistique le trafic de transit direct, les importations et exportations temporaires, les transactions portant sur les navires et aéronefs usagés, l'avitaillement et les soutages pour navires et aéronefs, les monnaies métalliques ou fiduciaires et les matières d'or où le métal représente plus de 80 % de la valeur totale. Les transactions de faible importance peuvent également être exclues;

d) Les produits et catégories de produits sont définis et classés selon la *Classification Type pour le Commerce International (C.T.C.I.) Révisée**. Toutefois, le manque de place a obligé à abréger certaines désignations dans les tableaux.

e) La ventilation géographique se réfère aux pays d'origine/consommation (dernière destination connue). Les territoires statistiques de ces pays sont définis dans la nomenclature géographique de l'O.C.D.E., publiée à la fin du premier fascicule de cette série;

f) La nécessité de garder secrets certains renseignements à un niveau détaillé de la classification peut entraîner, pour quelques pays, l'existence de divergences entre les totaux calculés à divers niveaux d'agrégation.

(1) Des données sont également publiées pour la Yougoslavie qui est associée à certains travaux de l'O.C.D.E.

(2) Cf. page 4 pour la composition des zones géographiques.

(3) Le texte français de la liste des produits est encarté dans le fascicule 1 de chaque livraison trimestrielle.

ORGANISATION DE COOPERATION ET DE DEVELOPPEMENT ECONOMIQUES

OECD ECONOMIC OUTLOOK

Each July and December the OECD ECONOMIC OUTLOOK surveys the latest economic developments in the OECD area and, by means of an integrated set of quantitative forecasts, assesses future prospects. In addition, there are frequently special studies designed to assist the interpretation of economic trends.

PERSPECTIVES ECONOMIQUES

En juillet et décembre les PERSPECTIVES ECONOMIQUES DE L'OCDE donnent un aperçu général de l'évolution économique la plus récente dans l'ensemble de la zone OCDE et, au moyen d'une série de prévisions quantitatives integrées, évaluent les perspectives. En supplément, cette publication contient fréquemment des études spéciales destinees à faciliter l'interprétation des tendances économiques.
